SCHOOL LEVEL PLAN
LOW SES SCHOOL COMMUNITIES NP

2013

KEY CONTACT AT SCHOOL: Naomi Martin
PURPOSE OF NATIONAL PARTNERSHIP IN LOW SES SCHOOL COMMUNITIES

Funding provided through the Commonwealth Government Smarter Schools National Partnership Program, along with co-investment from the Western Australian education sectors and schools, is designed to build the capacity of Western Australian schools to contribute to the achievement of the following five higher level outcomes:

- All children are engaged in and benefitting from schooling
- Young people are meeting basic literacy and numeracy standards, and overall levels of literacy and numeracy achievement are improving
- Schooling promotes the social inclusion and reduces the educational disadvantage of children, especially Indigenous children
- Australian students excel by international standards
- Young people make a successful transition from school to work and further study

The Catholic Education Office National Partnership for Low SES School Communities:

- Aims to improve literacy and numeracy achievement across all years of schooling
- Provides a focus on strategies which will raise attendance and allow students who move between schools to be tracked and supported
- Supports schools to raise the resilience and engagement of students
- Aims to assist in up skilling staff, particularly Aboriginal Teacher Assistants
- Is contextualised in whole school improvement initiatives
- Links closely to initiatives in other National Partnership Programs
- Aligns to key policy strategies such as the ‘Closing the Gap’ strategy and the ‘Indigenous Education Action Plan Draft’ which involve schools with Aboriginal students, especially in the Kimberley.

Reporting in this National Partnership will occur against key reforms and milestones and will include qualitative and quantitative data which describe the degree of participation, the key processes and important outcomes, especially those that relate to improved student achievement and attendance.
**School Profile**

St Joseph’s School, Wyndham is a co-educational primary school with a current enrolment of approximately 90 students from Aboriginal and non-Aboriginal backgrounds. Wyndham is Western Australia’s most northerly town, with a population of approximately 1,000. The school was opened in 1964 and enjoys strong ties with the local community. This history helps to engender a sense of pride and ownership in the current students. The school is involved in a number of programs and projects to enhance learning such as the Kimberley Literacy Initiative, Leading Aligned Numeracy Development, various health initiatives and a number of attendance plan strategies. Aboriginal Studies is an integral part of the curriculum, which teaching assistants and teachers plan for collaboratively. The school is both committed to and models Reconciliation, as children from a variety of cultural backgrounds learn and grow together in a school environment which respects the individual and promotes harmonious relations. The school and wider community work together to provide opportunities and encourage all to succeed, with the local community expecting a professional school environment with meaningful and culturally aware learning outcomes for all students.

**Involvement and Support in Specific Low SES Projects**

**Aboriginal Teacher Assistant Up Skilling**

This project provides support for ATAs in Kimberley schools particularly in developing skills and competencies to assist them in classroom support, especially in literacy and numeracy. Support through this program involves school visits and *in situ* mentoring from a dedicated consultant operating from the Broome Regional Office; literacy and numeracy skills development; central support in Broome with opportunities to share learning; and opportunities to undertake Certificate level training through the Batchelor Institute of Indigenous Tertiary Education.

The outcomes of this project relate to enhanced skills and competencies for ATAs, more engagement in the classroom learning process and ultimately, enhanced outcomes for students.

**Extension of Bluearth Program**

The Bluearth Program has a proven record in developing social, emotional; interpersonal, personal and physical attributes of students. This typically leads to students who are healthier, more engaged and exhibiting increased attendance rates. This project provides financial and other support to participating schools. The financial support allows for visits to the school by accredited Bluearth trainers as well as support to train other staff members.

The specific outcomes of this project relate to enhanced interpersonal, personal, health and engagement outcomes which are recognised as being essential for improved learning.

**Intensified Literacy Support**

This project provides additional support to Low SES schools to improve levels of literacy and numeracy. Broome Regional Office consultants visit Kimberley schools on a planned cycle to provide *in situ* support and training. Funds are also available to implement specific programs such as Reading Recovery.

The specific outcomes of this support will be to increase levels of literacy and numeracy across all years, but with a specific focus on those students at or below benchmarks and in the early years of schooling.

**Promoting Alternate Thinking Strategies**

This is an internationally acclaimed program which develops a stronger sense of achievement, confidence, self efficacy and interpersonal skills in students. It provides teachers with resources and a framework for classroom management and discipline processes. Support to schools occurs through assistance in the purchase of PATHS kits. In the Kimberley, a consultant has been engaged on contract to visit schools and assist with ongoing training and support to teachers.

The specific outcomes relate to more appropriate classroom practices, better levels of general self-discipline and ultimately, higher levels of achievement.
**Tracking Students**

As a move to monitor and improve attendance, schools are now reporting absentees through MAZE in a centralised campus mode. Absentee data is uploaded regularly to the Tri Border SIF-AU database. The same information will be uploaded to the Kimberley Success Zone project with the inclusion of St Mary’s College (K-12), Broome.

Specific support has been designated through the creation of structures and processes, negotiation with other systems/sectors, development of appropriate attendance record processes and methods for exchange of information. Schools will be directly supported through training, ongoing professional support and direct payments for administrative roles involved in the project.

Outcomes will include a clearer record of student attendance and the ability to support students through exchange of educational programs and achievement information. Enhanced student learning outcomes will hopefully result.

**Targeted Initiatives: Kimberley**

To further expand the Extending the School Day model, this project will enable an extension of the type of services available for students and parents alike. In addition, targeted initiatives may also be undertaken in the school, to provide particular ‘wrap-around’ services that will further assist the school and local community.

Outcomes relate to increased engagement and attendance which will be reflected in higher levels of achievement. Improved health and wellness outcomes are also anticipated.
